

Effluent Treatment Plant (ETP)

From primary clarification to advanced membrane separation technology, **AIMS** has the technology, products, engineering and O&M to provide a wholesome solution to your effluents.

In the evolving industrial utility balance scenario, effluent treatment has slowly progressed from a "cost intensive, end-of-pipe, statutory base" process to emerge as a "value added, voluntary base" process, wherein you not only do your bit for the environment but also benefit from the action!

Whatever be the effluent, however complex, involve us. We will provide the answers.

Evolution - Paradigm shift of one central thought

Organizational Introduction

AIMS is a registered private limited company, under Companies Act 1956. **AIMS** is fundamentally a strong engineering organization carrying expertise of more than a decade in water engineering. **AIMS** is a young, vibrant organization with strong technical expertise experience, in the chosen field of business.

We are a combination of youthful jest bonded with practical, 'in-field' experience. We are in the water treatment, Sewage Treatment and Effluent Treatment - whatever your requirements on water & effluent treatment, we bring about clear, technically superior and cost effective solutions. Only quality and branded materials go into our products / processes.

Vision Statement

- It is our dedicated vision to be the most preferred solution provider of all water and waste water treatment systems worldwide.
- The most preferred employer of professional who will be empowered to work towards individual and organizational growth.

Mission Statement

- **AIMS** will be the acknowledged industrial benchmark in
 - > Innovation
 - > Quality
 - > Human resource participation, training & empowerment
 - > Customer satisfaction
 - > Prompt and immediate service

Quality Assurance

- We will exhibit high level of corporate responsibility in evolving, implementing and sustaining continual quality improvement in all our activities.
- All our employees, suppliers and other associated agencies help us and in turn be helped in ensuring quality in all activities
- Proper training, exposure, feedback and improvement of quality engineering will be imparted to our employees and all concerned parties.

Our Motto

Reliability, sustainability and better service.

Our Products & Services

- Sewage Treatment Plants – (STP)
EADOx and Conventional
- Effluent Treatment Plants - (ETP)
- Zero Discharge - (ETP)
- Water Treatment Plants - (WTP)
- Reverse Osmosis Plant
- Operation & Maintenance
- Revamping of Existing Plant
- Annual Maintenance Contract

Sewage Treatment Plants (STP)

AIMS has a tremendous edge over most other solution providers. We have not one, but two types of STP solutions to offer to our customers:

- EADOx process
- SAFF process

Conventionally, STP is always viewed as an "area intensive", "civil works intensive", "power intensive" and "sludge intensive" process.

The EADOx as well as SAFF process completely breaks this thought process :

SAFF is a direct substitute for all biological processes – be it extended aeration, Fluidized Bed Reactors (FBR) process, Rotating Biological Contactors (RBC) and all other "brand name" processes – which are all attached growth process.

What EADOx is

EADOX

- cheaper .
- lesser foot print.
- lower operating cost.
- "noise-free".
- requires less civil works.
- "switch on - switch off" system.
- more than 100 installations.
- available for various capacities.
- the real future of STP

Sustained Treated Water for Re-use

Save power

Switch on / off system

Save fixed cost

Noise free

Maintenance free

EADOX
Sewage Treatment

Water Treatment Plants

- Iron removal
- Filtration
- Softening
- De Mineralization
- Reverse Osmosis
- Speciality water treatment applications
- DoRO (Domestic RO)

Waste Water Treatment Plants

- Clarifiers
- Ultra Filters
- Nano Filters
- Filter Press
- Zero Discharge Systems
- Mechanical Evaporators
- Dissolved Air Floatation Plant

Domestic R.O. Plant

Industrial R.O. Plant
